Coverage built around your site

Equipment quantities and size limits are transcribed from the supplied equipment schedule. Split indoor and outdoor components are shown separately.

Equipment / designation	Size limit	Qty	Major	Minor	Coil*
Packaged rooftop units	To 25 tons	4	1	3	1
Split-system air handlers	To 5 tons	2	1	3	0
Split-system condensers	To 5 tons	2	1	3	1

Major / Minor / Coil columns show visits or cleanings per listed component per contract year. *Coil = condenser-coil cleaning; no boiler cleaning is included.

SITE-SPECIFIC SCOPE NOTE

Two air handlers and two condensers represent two complete split systems. All four rooftop units remain included in quarterly service.

BASELINE INVENTORY & ACCESS

At onboarding, confirm asset tags, model / serial numbers, filter sizes and counts, roof and indoor access, and operating condition. Listed size limits are category limits, not verified nameplate capacities. Final coverage follows the confirmed schedule.

A CLEAR RECORD FOR MANAGEMENT

Each scheduled visit includes a service report, operating status, visible deficiencies and prioritized repair recommendations. Photos document relevant findings where access permits. Corrective work is quoted for approval before execution.

Service is maintenance-only. Repair labor, replacement parts and refrigerant are excluded unless separately approved. Site inventory and access verification must be completed before signing the final service schedule.

A disciplined quarterly program

Four scheduled service rounds per year: one major inspection and three minor inspections. Annual condenser cleaning follows the covered equipment schedule.

Service round	Timing from activation	Included work
01 - Major	Month 1	Major inspection, standard filters, scheduled annual condenser cleaning
02 - Minor	Month 4	Minor inspection and standard filter service
03 - Minor	Month 7	Minor inspection and standard filter service
04 - Minor	Month 10	Minor inspection and standard filter service

MAJOR INSPECTION

Inspect accessible electrical connections, contactors and capacitors; check motors, bearings, fan blades, drive belts and blower condition. Verify controls, operating temperatures, voltage / amperage and refrigeration performance where applicable. Inspect outdoor-air settings and economizer operation where fitted.

MINOR INSPECTIONS

Check operating condition, controls, unusual noise or vibration, accessible electrical condition, belts and bearings where fitted, cabinet seals and condensate drainage. Record deficiencies and recommended follow-up.

FILTERS, COILS & CONDENSATE

Replace standard disposable filters quarterly with equivalent media; clean reusable mini-split / VRF filters where applicable. Routine drive belts, lubrication and cleaning consumables are included where required by scheduled maintenance. Clean condenser coils once annually using equipment-appropriate methods on listed assets. Inspect evaporator coils; inspect and clean accessible pans as needed and clear accessible routine drain restrictions.

Evaporator chemical cleaning, coil removal, deep restoration and drain reconstruction are separately quoted. There is no separate surcharge for the annual condenser cleaning included above.

Lower cost. Greater portfolio value.

Each account starts 10% below its supplied first-year benchmark. Additional accounts unlock a shared discount across all eligible enrolled locations.

First-year reference	Annual	Monthly
Supplied benchmark	$9,000.00	$750.00
O'Brien standalone price	$8,100.00	$675.00
Standalone savings	$900.00	10% below benchmark

Active accounts	Extra discount*	This site / year	This site / month
1	0%	$8,100.00	$675.00
2	2%	$7,938.00	$661.50
3	4%	$7,776.00	$648.00
4	6%	$7,614.00	$634.50
5	8%	$7,452.00	$621.00
6	10%	$7,290.00	$607.50
7	12%	$7,128.00	$594.00

*Each additional eligible account adds 2 percentage points off the O'Brien standalone price. Maximum: 12% at seven accounts. This is applied after the initial 10% reduction, not added to it. At seven accounts, this site saves **$1,872.00 annually (20.8%)** against the supplied first-year benchmark.

Benchmark source: Volkswagen of South Miami PM.pdf, pricing section, supplied March 2025 proposal. Listed reference years: $9,000.00, $9,324.00, $9,648.00. These are supplied proposal figures, not verified current invoices. This comparison concerns scheduled maintenance; emergency response commitments and repair benefits may differ.

Maintenance exclusions & clarifications

Scheduled maintenance covers the tasks and equipment expressly listed in this proposal. Additional work requires a separate quotation and approval.

CORRECTIVE REPAIRS, PARTS & REFRIGERANT

Troubleshooting beyond routine inspection, invasive leak tracing, leak repair, refrigerant recovery/recharge and corrective repairs or replacement of components/equipment are excluded from the maintenance fee. Existing defects and deterioration requiring corrective work are separately quoted. The active-plan parts and labor discount applies as described on the next page.

FILTERS, BELTS & ROUTINE CONSUMABLES

Quarterly equivalent standard disposable filters, reusable mini-split/VRF filter cleaning, routine drive belts, lubrication and scheduled cleaning consumables remain included. Specialty/HEPA/carbon media, upgraded filtration, custom media, filter-rack alterations and additional filter changes beyond the schedule are separately quoted.

COILS, PANS & DRAINAGE

Annual condenser-coil cleaning on scheduled assets, accessible pan cleaning as needed and clearing accessible routine drain restrictions remain included. Chemical evaporator cleaning, coil removal, deep restoration, internal disassembly, drain reconstruction and concealed/inaccessible drain work are excluded.

EQUIPMENT & COVERAGE LIMITS

Coverage is limited to the assets and service locations expressly listed in this proposal. Unlisted equipment, added locations and tasks beyond the agreed schedule require a written scope and price before inclusion. Site-specific coverage notes on the equipment schedule remain applicable.

SPECIAL ACCESS & WORK BY OTHER TRADES

Crane, forklift/scissor-lift rental, scaffolding, special rigging, ceiling/wall demolition and reinstatement, structural or roofing repairs, and primary electrical upgrades are excluded. Ductwork replacement, major air-distribution changes, formal TAB reports and BMS/fire-alarm integration are separately quoted or provided by others.

EMERGENCY SERVICE & OTHER EXCLUDED WORK

Emergency, after-hours, weekend and holiday visits, unscheduled call-outs, hazardous-material/mold remediation and restoration of water-damaged building finishes are excluded from the maintenance fee. No free call-outs or guaranteed emergency response time are included. Service remains subject to safe access, operating conditions and availability.

Maintenance documents equipment condition and supports ongoing operation; it does not include replacement of worn or failed equipment or guarantee uninterrupted operation between scheduled visits.

Your maintenance member benefits

Scheduled care, consistent reporting and preferred pricing on future additional work.

10% OFF PARTS & LABOR

While this maintenance agreement is active, Volkswagen of South Miami receives **10% off O'Brien's standard quoted parts and labor charges for any approved additional repairs, replacements or other work at this covered location.**

HOW THE ADDITIONAL-WORK DISCOUNT APPLIES

The 10% discount will be shown on the separate work quotation before approval. It applies to O'Brien parts and labor charges; taxes, permit fees, equipment rentals and third-party pass-through charges are excluded from this discount. The benefit does not reduce the maintenance-plan fee and is not combined with another parts/labor promotion for the same work. Additional work remains separately authorized and billed.

SCHEDULED SERVICE & ADDITIONAL WORK

Scheduled maintenance is performed during normal weekday business hours with safe access and site utilities available. Emergency or after-hours work is subject to separate approval and availability; the active-plan discount still applies to O'Brien parts and labor charges for that work. Tasks already included in scheduled maintenance carry no separate charge.

PORTFOLIO DISCOUNT RULES

Eligible accounts are distinct dealership service agreements from the seven-account group presented with this offer, under common purchasing control, signed, activated and in good standing. Enrollment order does not change eligibility. Each new account increases the shared maintenance discount from the next full monthly billing cycle; no retroactive credit. If an account closes or ends, the tier adjusts prospectively for remaining accounts. No stacking with other maintenance promotions.

TERM & PAYMENT

Term: 12 months from the agreed activation date. Monthly invoicing in advance; net 30 payment. Base maintenance pricing is fixed for this initial term, subject to the stated inventory/access confirmation. Portfolio-tier changes affect the maintenance discount only. Renewal pricing and scope require written agreement; no automatic annual increase is included.

The additional-work benefit is separate from the maintenance portfolio incentives. The $8,100.00 annual / $675.00 monthly standalone plan and the account-tier pricing shown earlier remain the maintenance prices.

Activation, selection & acceptance

A one-year agreement with the included service schedule, exclusions and 10% additional-work parts and labor benefit.

ACTIVATION CHECK

Confirm actual filter requirements, equipment condition, final covered inventory, access arrangements and any additional service addresses before activation. If these differ materially from the supplied schedule, any price or scope change must be agreed in writing before activation. Coordinate the start date after the customer resolves any existing agreement obligations.

ACCESS, SCHEDULING & CHANGES

The customer provides agreed roof/indoor access, site utilities and required facility coordination. Work that cannot be performed safely or without special access will be reported and rescheduled or separately quoted as appropriate. Added visits, assets or tasks require written agreement. Corrective work is quoted for approval before execution.

INCLUDED SERVICE RECORD

Each scheduled visit includes a service report, operating status, visible deficiencies and prioritized repair recommendations. Relevant photos are included where access permits. The covered schedule remains four annual rounds: one major inspection and three minor inspections, with annual condenser cleaning only where listed.

SELECTION

Active eligible accounts at activation: _____
Additional portfolio discount: _____%
Selected annual maintenance price: $_____
Monthly payment: $_____
Service start date: _____
Applicable taxes, if any, are additional.

I accept the listed maintenance scope, schedule, selected price, exclusions and terms, including the 10% parts and labor benefit on separately approved additional work during the active agreement.
