01 / COVERED EQUIPMENT INVENTORY

Eight systems. One service program.

COVERED EQUIPMENT

Eight CaptiveAire DOAS units serving the garage/service-shop area. Eight standard replacement filters per unit are included. Physical tags, models, serial numbers, capacities and filter dimensions will be recorded during onboarding.

Unit identifier	Manufacturer / equipment	Filters per unit
Fan #1	CaptiveAire / DOAS	8
Fan #2	CaptiveAire / DOAS	8
Fan #3	CaptiveAire / DOAS	8
Fan #4	CaptiveAire / DOAS	8
Fan #5	CaptiveAire / DOAS	8
Fan #6	CaptiveAire / DOAS	8
Fan #7	CaptiveAire / DOAS	8
Fan #8	CaptiveAire / DOAS	8

ANNUAL FILTER COVERAGE

Standard replacement filters are included for each covered unit at all six scheduled visits.

Fan identifiers follow the supplied unit inventory. Photo-to-unit identification, nameplate details and filter dimensions will be confirmed on site.

02 / PROPOSED ANNUAL SCHEDULE

A consistent maintenance rhythm

Eight covered units. Six full maintenance visits annually, every two months. Each visit includes both coil cleans, drain pan cleaning, filter changes and operating checks.

Round	Timing	Scheduled service
1	Month 1	FULL MAINTENANCE + FILTER SERVICE
2	Month 3	FULL MAINTENANCE + FILTER SERVICE
3	Month 5	FULL MAINTENANCE + FILTER SERVICE
4	Month 7	FULL MAINTENANCE + FILTER SERVICE
5	Month 9	FULL MAINTENANCE + FILTER SERVICE
6	Month 11	FULL MAINTENANCE + FILTER SERVICE

GARAGE / SERVICE-SHOP ENVIRONMENT

Vehicle exhaust, dust and airborne debris can increase filter and coil loading. Inspect actual conditions at each visit and recommend additional cleaning or a shorter filter interval when needed. Additional visits require approval.

BASELINE INVENTORY

Record the eight asset tags, model and serial numbers, filter sizes, quantity and media type, service access and operating settings before activation. Eight standard filters per unit are included.

Full maintenance is scheduled every two months. Final dates, access and filter requirements are confirmed in the signed service agreement.

03 / INCLUDED PREVENTIVE MAINTENANCE

The work behind reliable operation

SIX FULL MAINTENANCE VISITS

Clean accessible condenser and evaporator coils with equipment-appropriate methods. Clean accessible drain pans; flush routine serviceable drain restrictions and verify drainage. Inspect blower assemblies, fans, motors, belts and drives where fitted.

ELECTRICAL & OPERATING CHECKS

Inspect accessible electrical connections, contactors, capacitors, disconnects and safeties. Check operating voltage and amperage where practical. Verify controls, abnormal noise or vibration, operating temperatures and cooling response.

SIX FILTER-SERVICE ROUNDS

Inspect and service each covered unit's filters every two months. Replace approved disposable media or clean reusable media where applicable. Includes standard replacement filters for all eight covered units. Verify dimensions before ordering; specialty media or changed quantities require a written adjustment.

CASLINK REVIEW & SERVICE RECORD

Review available CasLink connectivity, cooling state and temperature readings during scheduled visits when authorized access is available. Record relevant findings and recommendations alongside the physical inspection and maintenance completed.

CUSTOMER REPORTING

Provide a dated service report with the units serviced, work completed, available operating readings, photos of relevant findings and prioritized corrective recommendations. Coordinate follow-up work for approval.

CasLink access remains subject to manufacturer access and account permissions. Continuous monitoring, automated portal refresh and remote control are not included unless separately agreed.

Agreement approval & next steps

• Maintenance covers the eight confirmed CaptiveAire assets and scheduled visits described above during regular business hours, with safe site-approved access.

• Corrective repairs, replacement parts, refrigerant, leak repairs, major coil restoration, drain reconstruction, duct modifications, electrical upgrades, roof work and after-hours service are separately quoted.

• Scheduled visits include the operating checks described. Unscheduled service calls, diagnostics, additional visits and continuous remote monitoring require separate authorization.

• Customer or manufacturer provides authorized CasLink access. Access delays or unavailable readings do not substitute for the physical inspection.

• Proposal valid for 30 days from October 14, 2026. Pricing is for a one-year agreement covering the stated eight units and standard filter allowance. Service begins after written acceptance and scheduling.

ACTIVATE THE AGREEMENT

Confirm physical tags and filter dimensions, arrange authorized CasLink access, and agree on the start date, billing schedule and service calendar.
